ProviderSuite

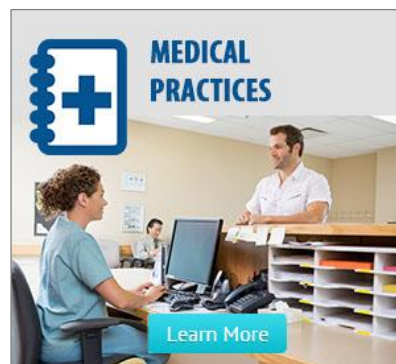

ProviderSuite combines scheduling and billing, two of the biggest jobs that you do.

- ProviderSuite provides the essentials to manage your practice. It incorporates the functionality of two high-capacity programs – ScheduleManager and BillingManager.
- Combined, they improve your revenue and reduce billing errors.
- Submit payment information from paper explanation of benefits (EOBs), manage your payments, find claim errors, and streamline re-submissions.
- Multi-client A/R management and reporting supports your work flow.
- Manage appointments, claims and payments from one place.
- Over 100 activity reports help you to monitor your business performance.
- The solution includes an ICD-10 crosswalk tool.
